📍 Lviv/Drohobych

ABOUT ME

Aspiring Data Analyst with strong analytical thinking and hands-on experience in exploratory data analysis using Python (Pandas, Matplotlib). Background in programming, calculus, and applied economics. Interested in data-driven decision making.

PROJECTS

Team project EDA with Pandas

My contribution to the project: investigating the relationship between two columns in a data set – student study time and performance in two subjects: Portuguese and mathematics

Discrete mathematics team project "Optimal order delivery"

My part is a comparison of Greedy and Exact algorithms, using the time and matplotlib libraries for visualization.

WORK EXPERIENCE

Drohobych City Hospital No. 1 | 2025

Medical registrar

Work in human resources department: updating employee data(annual leave, sick leave and unpaid leave), partial military record keeping

EDUCATION

Ukrainian Catholic University | 2025-2029

Bachelor of IT and Decision analysis

Regional Scientific lyceum, Drohobych | 2023-2025

Upper Secondary Education

SKILLS

- Python (Pandas, Matplotlib, Seaborn, Librosa)
- Git
- Django
- Excel
- Basis of R
- Basis of Project Management
